## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: as indicated in Applicant's Appeal Brief, Mankins does not sufficiently teach or suggest an aluminum-free single crystal seed alloy as claimed. In fact, Mankins includes teachings directly opposite this (see paragraph spanning cols. 3 and 4) by requiring the face of the seed alloy to be cleaned to remove contaminants. Thus, when viewed as a whole, the disclosure of Mankins teaches one of ordinary skill in the art to add at least some Al to the seed alloy, particularly 6-9 wt% Al+Ti. Thus, the independent claims 1, 10, 13, 18, 19 and 20 of the present application are allowable over the disclosure of Mankins because Mankins does not teach or suggest an aluminum-free seed alloy. For at least this reason, dependent claims 2-5, 7-9, 11, 12 and 14-17 are also allowable. In addition, while Demonis et al (RU 2158781) teaches a single crystal seed alloy that contains 25-50 wt% of a period VI element (Re) the date of publication of Demonis et al is after the earliest granted priority date of the present application. Therefore, Demonis et al is not available as prior art against the present application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
